

MEMORANDUM

To: SEFLUC

From: Edward P. de la Parte and Nicolas Porter

Date: March 9, 2020

RE: 2020 Legislation – SEFLUC March Update

The following is a summary of legislation which may be of interest to the Southeast Florida Utility Council (“SEFLUC”). A summary of proposed changes and an analysis of impacts to SEFLUC are presented for each bill. In some cases, because of the length of the bill, the analysis may be limited to only those provisions impacting SEFLUC. In the event a more extensive summary and analysis is required, a separate memo addressing the specific legislation can be prepared upon request.

List of Bills Contained in Memo:

1. **SB 246/HB 101 Public Construction (Hooper/Andrade)**
2. **SB 504/HB 279 – Local Government Public Construction Works (Perry/Smith)**
3. **SB 712 – Water Quality Improvements (Mayfield)**
4. **HB 1343 Water Quality Improvements (Payne)**
5. **SB 1450/HB 1091 – Environmental Enforcement (Gruters/Fine)**
6. **HB 637 - Impact Fees (DiCeglie)**
7. **HB 715/SB 1656 – Reclaimed Water (Maggard/Albritton)**
8. **HB 865/SB 538 – Emergency Reporting (Rodriguez/Diaz)**
9. **HB 729/SB 1238 - Regulatory Reform (Rodriguez/Sabatini)**
10. **SB 1112/HB 861 – Bottled Water Excise Tax (Taddeo/Willhite)**
11. **HB 139 – Drinking Water in Public Schools (Jenne)**
12. **HB 799/801 – Public Records (Gregory)**
13. **SB 178/HB 579 – Public Financing of Construction Projects (Rodriguez/Aloupis)**
14. **SB 1340/HB 0007-Legal Notices (Gruters/Sabatini)**
15. **SB 1382 – Environmental Resource Management (Albritton)**
16. **HB 1067 – Florida Endangered and Threatened Species Act (Hattersley/Eskamani/Joseph)**
17. **SB 150 – Sanitary Sewer Laterals (Brandes)**
18. **HB 1199 Environmental Protection Act – 2020 (Ingoglia)**
19. **SB 1798 Environmental Protection (Bradley)**
20. **HB 1267 Biosolids Management – 2020 (Grall)**
21. **SB 1720/HB 1427 Florida Safe Drinking Water Act – 2020 (Cruz/Mercado)**

22. **HB 1095/SB 1464 Underground Facility Damage Prevention and Safety (Fitzenhagen/Flores)**
23. **SB 1382 – Environmental Resource Management (Albritton)**
24. **HB 147/SB 690 – Water Resources (Jacobs/Albritton)**
25. **SB 454 – Discharge of Domestic Wastewater (Rodriguez)**
26. **SB 492 – Public Notification of Pollution (Cruz)**
27. **HB 405/SB 686 – Stormwater Management Systems (Good/Gruters)**
28. **SB 200/HB 547 – Advanced Well Stimulation Treatment (Montford/Fitzhagen)**

BILLS

1. SB 246/HB 101 Public Construction (Hooper/Andrade)

Summary:

- Amends existing law regarding retainage for state and local government contracts.
- For construction contracts with state or local governments for more than \$200,000, retainage changed from 10% when less than 50% of the project is complete and 5% when more than 50% of the project is complete, to % for the entire project.
- For construction contracts worth less than \$200,000, retainage reduced from 10% to 5%.
- Repeals the ability of a contractor to request the entity release up to half the retained amount after half the project is finished, and ability of contractor to withhold more than 5% of each progress payment to subcontractors after half a project is completed.
- Does not apply to contracts entered into on or before October 1, 2020.

2/26/20 – **Read third time, passed (40 YEAS, 0 NAYS)**

2. SB 504/HB 279 – Local Government Public Construction Works (Perry/Smith)

Summary:

- Specifies the manner in which the estimated cost of a public building construction project is to be determined in deciding whether it is in the local government’s best interest to perform the project using its own services or through an outside contractor, by accounting for all costs associated, including employee compensation, equipment costs, insurance, cost of materials.
- SB CS removes provision that prohibits the local government from performing the project using its own employees and equipment if the project request and increase in the number of government employees or increase in such capital expenditures.
- HB CS raised the threshold above which a political subdivision seeking to construct or improve a public building or structure must competitively bid the project from \$300,000 to \$400,000, as well as raising the same threshold for electrical work from \$75,000 to \$100,000.
- HB and SB CS/CS removes references to “generally accepted cost-accounting principles,” revises the term “cost” to include specified information and requires local governments to consider certain estimated costs before deciding to use their own services. HB CS/CS returns threshold to \$300,000 for competitive bidding and \$75,000 for electrical work.

3. SB 712 – Water Quality Improvements (Mayfield)

Summary:

- Effectuates a type two transfer of OSTDS oversight from DOH to DEP rather than requires DEP to develop rules related to septic tank location taking into account advanced designs, impaired water bodies, wastewater and drinking water infrastructure, potable water sources, nonpotable wells, stormwater infrastructure, remediation plans, nutrient pollution, recommendations of OSTDS advisory committee.
- Requires local governments to develop OSTDS remediation plans within BMAPs if DEP determines OSTDS contributes at least 20% of the nutrient pollution or remediation is necessary to achieve TMDL. Plans must be adopted by July 1, 2025.
- Requires DEP to adopt rules to limit, reduce, eliminate leaks seepages, or inputs into wastewater collection systems.
- Adds to DEP penalty schedule \$4,000 for failure to survey an adequate portion of a wastewater collection system and take steps to reduce SSOs, leaks, infiltrations.
- Increases DEP administrative penalty cap from \$10,000 to \$50,000.
- Doubles wastewater administrative penalties.

- Requires sewage facilities to provide for power outage contingency plan for collection and pump systems.
- Requires studies related to SSO and leaks.
- DEP may not fix or revise utility rates of budgets that utilities that need to report on infiltration and inflow and leakage, only need to submit one report to the DEP annually.
- Requires DEP to adopt rules for biosolid management. Provides requirements for biosolid management prohibiting application of biosolids within 15 cm of the seasonal high-water table, increased monitoring requirements. Clarifies that local governments with biosolids ordinances may retain those ordinances until repealed.
- Revises to one the number of cabinet members that must concur with governor's appointment of DEP secretary.
- Requires unanimous vote of WMD governing board to approve spring bottled water consumptive use permit (expires June 30, 2022).

Compare Bills

HB 1343 Water Quality Improvements (Payne)

4. HB 1343 Water Quality Improvements (Payne)

Summary:

- Similar to SB 712, as amended.

- Transfers the OSTDS program from the DOH to DEP, requires the departments to submit recommendations to the Governor and Legislature regarding the transfer of the Onsite Sewage Program, repeals certain advisory committees related to OSTDSs; creates an OSTDS technical advisory committee to make recommendations that increase the availability of nutrient removing OSTDSs and assist DEP in the development of setback distances; and requires OSTDS remediation plans.
- Requires any facility for sanitary sewer disposal to have a power outage contingency plan that mitigates the impacts of power outages on systems.
- Requires sanitary sewage facilities that control a collection or transmission system of pipes and pumps to collect or transmit wastewater to the facility to take steps to prevent SSOs or underground pipe leaks and ensure collected wastewater reaches the facility. The bill further requires these facilities to develop pipe assessment, repair, and replacement action plans using I&I studies and leakage surveys.
- Requires DEP to adopt rules relating to location of OSTDS, including setback distances, enhanced nutrient-reducing OSTDS designs, impaired or degraded water bodies, domestic wastewater and drinking water infrastructure, potable water sources, non-potable wells, stormwater infrastructure, OSTDS remediation plans, nutrient pollution, and recommendations by the OSTDS TAC. Provides for issuance of variances upon demonstration of undue hardship and that variance would not cause or contribute to TMDL violation.
- Requires DEP, by March 1 of each year, to submit a report to the Governor and the Legislature identifying all wastewater utilities that experienced an SSO in the preceding calendar year. The report must include the utility name, operator, number of overflows, and total quantity released. The bill further requires that, for each facility that experienced an overflow, DEP submit with the SSO report the annual report required for water pollution operation permits regarding facility revenues and expenditures
- Requires DEP to adopt rules for biosolids management and specifies that such rules may not take effect until ratified by the Legislature.
- Prohibits WMD from approving a CUP for spring bottled water, unless the application was submitted prior to January 1, 2020. Expires June 30, 2022.
- Requires concurrence of two cabinet members in governor appointment of DEP secretary.
- Prohibits local government from recognizing legal rights of plant, animal, body of water.

SB 0712 Water Quality Improvements (Mayfield)

5. SB 1450/HB 1091 – Environmental Enforcement –(Gruters/Fine)

Summary:

- Increases current daily maximum fines for waste and pollution violations in numerous existing environmental laws by 50%.
- Returns what constitutes a separate offense to the existing “[e]ach during any portion of which such violation occurs constitutes a separate offense” in several sections, including those on the following topics: coastal construction and activities, water resources, regulation of oil and gas resources, phosphate land reclamation, hazardous waste, criminal penalties for discharges of pollutants, and civil and criminal penalties in ch. 403, F.S.
- Adds the standard “[e]ach day during any portion of which such violation occurs constitutes a separate offense” to sections on the following topics: Biscayne Bay Aquatic Preserve, aquatic preserves, and gambling vessels.
- Adds to the administrative penalties in s. 403.121, F.S., that each day the cause of an unauthorized discharge of domestic wastewater is not addressed constitutes a separate offense.
- Adds to civil penalties in s. 403.141, F.S., that each day the cause of an unauthorized discharge of domestic wastewater is not addressed constitutes a separate offense until the violation is resolved by order or judgement.
- CS SB removes the “willfully” standard of intent from applying to criminal penalties in two statutes for consistency with 404 dredge and fill program.
- CS/CSs removes language that “[u]ntil a violation is resolved by order or judgement, each day during any portion of which such violation occurs or is not remediated constitutes a separate offense.” Language now provides “Each day during any portion of which such violation occurs constitutes a separate offense.” Each day the cause of an unauthorized discharge of domestic wastewater is not addressed constitutes a separate offense. Requires seller of real property to disclose known defects in sanitary sewer lateral. Doubles wastewater violation penalties.

6. HB 637 - Impact Fees (DiCeglie)

Summary:

- Revises conditions that local governments must satisfy before enacting impact fees, including greater specificity in calculation of impact fees by excluding costs which do not meet the definition of a capital asset.
- Requires segregation of revenues and expenditures of any impact fees regarding infrastructure in a separate trust fund.
- Must prepare an annual financial report for each impact fee trust fund and post to website.
- Government may not require collection of impact fee earlier than the date the building permit is issued.
- Impact fees are assignable and transferrable from one development parcel to another in the same impact fee jurisdiction for the same type of public facility.
- Government must establish impact fee review committee.

- CS/CS provides definition of “infrastructure” to mean construction, reconstruction, or improvement of a public facility, excluding the cost of repairs or maintenance, that have a life expectancy of 5 or more years. Impact fee may only be assessed for infrastructure costs.
- CS/CS/CS requires local government CFO to file annual affidavit attesting that impact fees were collected and expended in accordance with statute.

7. HB 715/SB 1656 – Reclaimed Water (Maggard/Albritton)

Summary:

- Builds upon Potable Reuse Commission’s 2019 Report regarding potable reuse implementation framework.
- CS/HB renames from “recycled water” to “potable reuse” and makes a number of other clarifications.
- Identifies recycled water as a water source for public supply systems.
- Provides that consideration of emerging constituents may be required due to existing requirements such as antidegradation and discharge standards, including monitoring and treatment technology.
- Defines groundwater augmentation, raw water augmentation, and surface water augmentation as alternative water supplies eligible for AWS funding.
- Requires DEP to adopt rules for implementation of water recycling projects that revise existing regulations to account for recycled water as a source for public supply and other requirements.
- Requires DEP to convene technical advisory committees regarding rulemaking.
- Any rules adopted by DEP must be ratified by Legislature.
- Provides for working group to develop consensus regarding CUP impact offsets, extended permit duration incentives, and cost share funding.
- Provides that beginning January 1, 2026, domestic wastewater treatment facilities are prohibited from disposing of effluent, reuse, and reclaimed water by surface water discharge, excepting permitted surface water augmentation projects, permitted wet weather discharges, facilities in fiscally constrained counties, domestic wastewater treatment facilities with reuse systems that provide a minimum of 90 percent of a facility's annual average flow and facilities within a rural area of opportunity.
- CS provides for a 3-year extension of deadlines for elimination of surface water discharges for public-private partnerships developing potable reuse projects, and given priority funding.
- CS requires local governments to authorize use of residential graywater technologies and provide incentives for developers to fully offset costs of graywater technology by providing density bonus incentives, reducing fees.
- CS/CS significantly revises prohibition on surface water discharges and instead requires each utility to develop and implement a plan to eliminate nonbeneficial surface water discharges. To avoid elimination plan must among demonstrate that elimination will cause “severe undue economic hardship on the community” including impact to ratepayers. Plan must be submitted by July 1, 2023 or one year after effective date of potable reuse rules.

8. HB 865/SB 538 – Emergency Reporting (Rodriguez/Diaz)

Summary

- Requires State Watch Office to create and maintain a list of reportable incidents.
- Reportable incidents include public health hazards, incidents of reportable pollution release, drinking water facility breach, major utility outage or disruption including transmission lines or substations.
- SWO to annually provide list of reportable incidents to each political subdivision.
- SWO establish guidelines specifying methods and formats for political subdivisions to use when reporting incident.
- As soon as practicable following reportable incident, subdivision must notify SWO that an incident has occurred in its jurisdiction.

13. SB 178/HB 579 – Public Financing of Construction Projects (Rodriguez/Aloupis)

Summary

- Requires a public entity that commissions or manages a construction project within the coastal building zone using funds appropriated from the state to conduct a sea-level impact projection (SLIP) study prior to commencing construction. The bill applies this requirement after completion of DEP rulemaking, only if certain baseline projections of sea-level rise and flooding impacts are ultimately adopted as the state's official estimates by the Sea-Level Rise Task Force.
- Requires DEP to adopt rules establishing standards for the SLIP studies, and the standards must include certain requirements for how the studies will be conducted and the information they must contain.
- Authorizes DEP to bring a civil action to seek injunctive relief to cease construction, enforce the section or rules adopted pursuant thereto, or seek recovery of state funds expended on a coastal structure, if construction commences without complying with the section.

15. SB 1382 – Environmental Resource Management – 2020 (Albritton)

Summary:

- Basin Management Action Plans (BMAPs) may include as an additional management strategy a cooperative agricultural regional water quality improvement element or a cooperative urban, suburban, commercial, or institutional water quality improvement element.
- Provides for implementation of new management strategies through cost-sharing program, including land acquisition through conservation easement, site specific water quality improvement or dispersed water management projects, reduction in stormwater nutrient loading.
- Provides for FDACs and IFAS studies evaluating BMAP effectiveness, effectiveness of BMPs.
- Establishes nutrient reduction cost-share program for retrofit of onsite sweater treatment and disposal systems, advanced waste treatment facilities, connection of OSTs to central sewer facilities.
- Local government cannot extend legal standing or legal rights under Florida Environmental Protection Act to a plant, animal, or body of water.
- CS requires BMPs or water quality monitoring to be adopted within 5 years of completion of a BMAP or amendment to a BMAP.

23. SB 1382 – Environmental Resource Management (Albritton)

Summary:

- Authorizes BMAPs to include cooperative agricultural regional water quality improvements (agricultural element) and cooperative urban, suburban, commercial, or regional water quality improvements (nonagricultural element), in addition to existing strategies such as best management practices and interim measures.

- Agricultural and nonagricultural elements shall be implemented through a cost-sharing program and may be included in a BMAP during the 5-year update.
- Requires adoption of nonpoint source BMPs, interim measures, or other measures adopted by rule within 5 years of adoption of the BMAP or BMAP amendment.
- Directs DEP, FDACS, and the Institute of Food and Agricultural Sciences (IFAS) of the University of Florida to address certain issues related to enhancing BMPs and the agricultural element.
- Creates a nutrient reduction cost-share program and requires DEP to prioritize certain projects. DEP must submit an annual report to the Governor and Legislature regarding the projects funded by this program.
